

~~“GOOD ENOUGH FOR GOVERNMENT WORK”~~

Doesn't apply in 2021 | @abhinemani

YOU HAVE TO GET CREATIVE

- Government opportunities in general
 - Work the network, well
- Government / civic innovation as an opportunity
 - Entrepreneurship/Startups
 - Foundations/Academia
 - Fellowships/Internships

GOVERNMENT

“Making bureaucracy sexy”

WORKING INSIDE GOVERNMENT

- Larger governments have internship / fellowship programs
- If not, or a smaller jurisdictions: work a connection
- Look for “*exempt*” jobs
 - “Tours of duty” are becoming more common
- Bring something to the table
 - Practical experience (thesis, research institutes, internships, campus groups, etc)
 - Technical: data visualization, startups methodologies (lean, agile, etc)
 - Non-technical: story-telling / writing, “design”
 - *Empathize, don't criticize...*

GOVERNMENT CONNECTIONS

- Empathy
 - Reframe *every* criticism you have of government as something *you have to wake up every morning and deal with*: that's your audience
- Do your homework
 - What has that government/individual done well?
- Think horizontally & vertically
 - “What governments in other places are doing interesting work?”
 - “Do you work much with the X [state, federal government, etc]?”

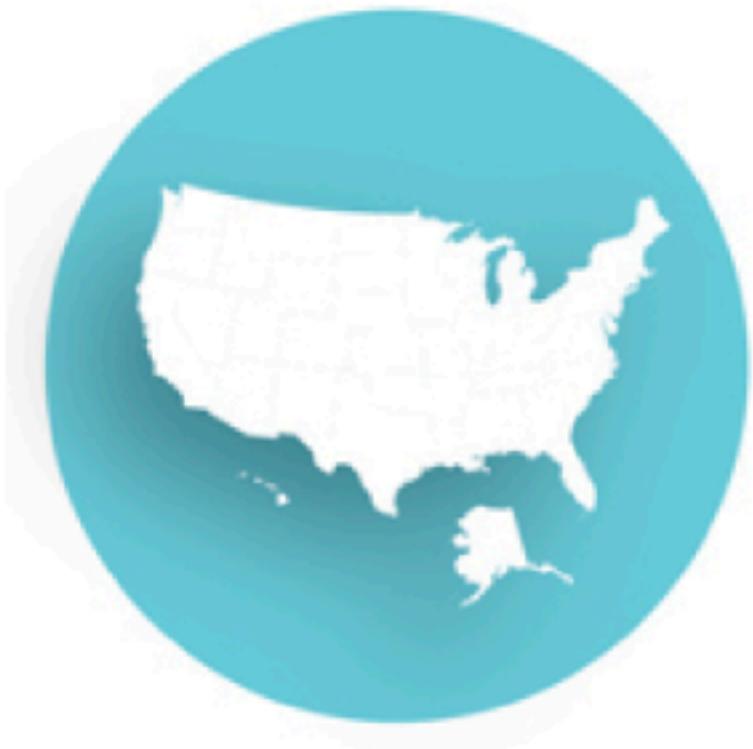

PUBLIC/PRIVATE

So you want to make money...

IT spending by 2014

Federal
\$112B

State & Local
\$60B

Total: \$172B

Video game market: ~\$10B

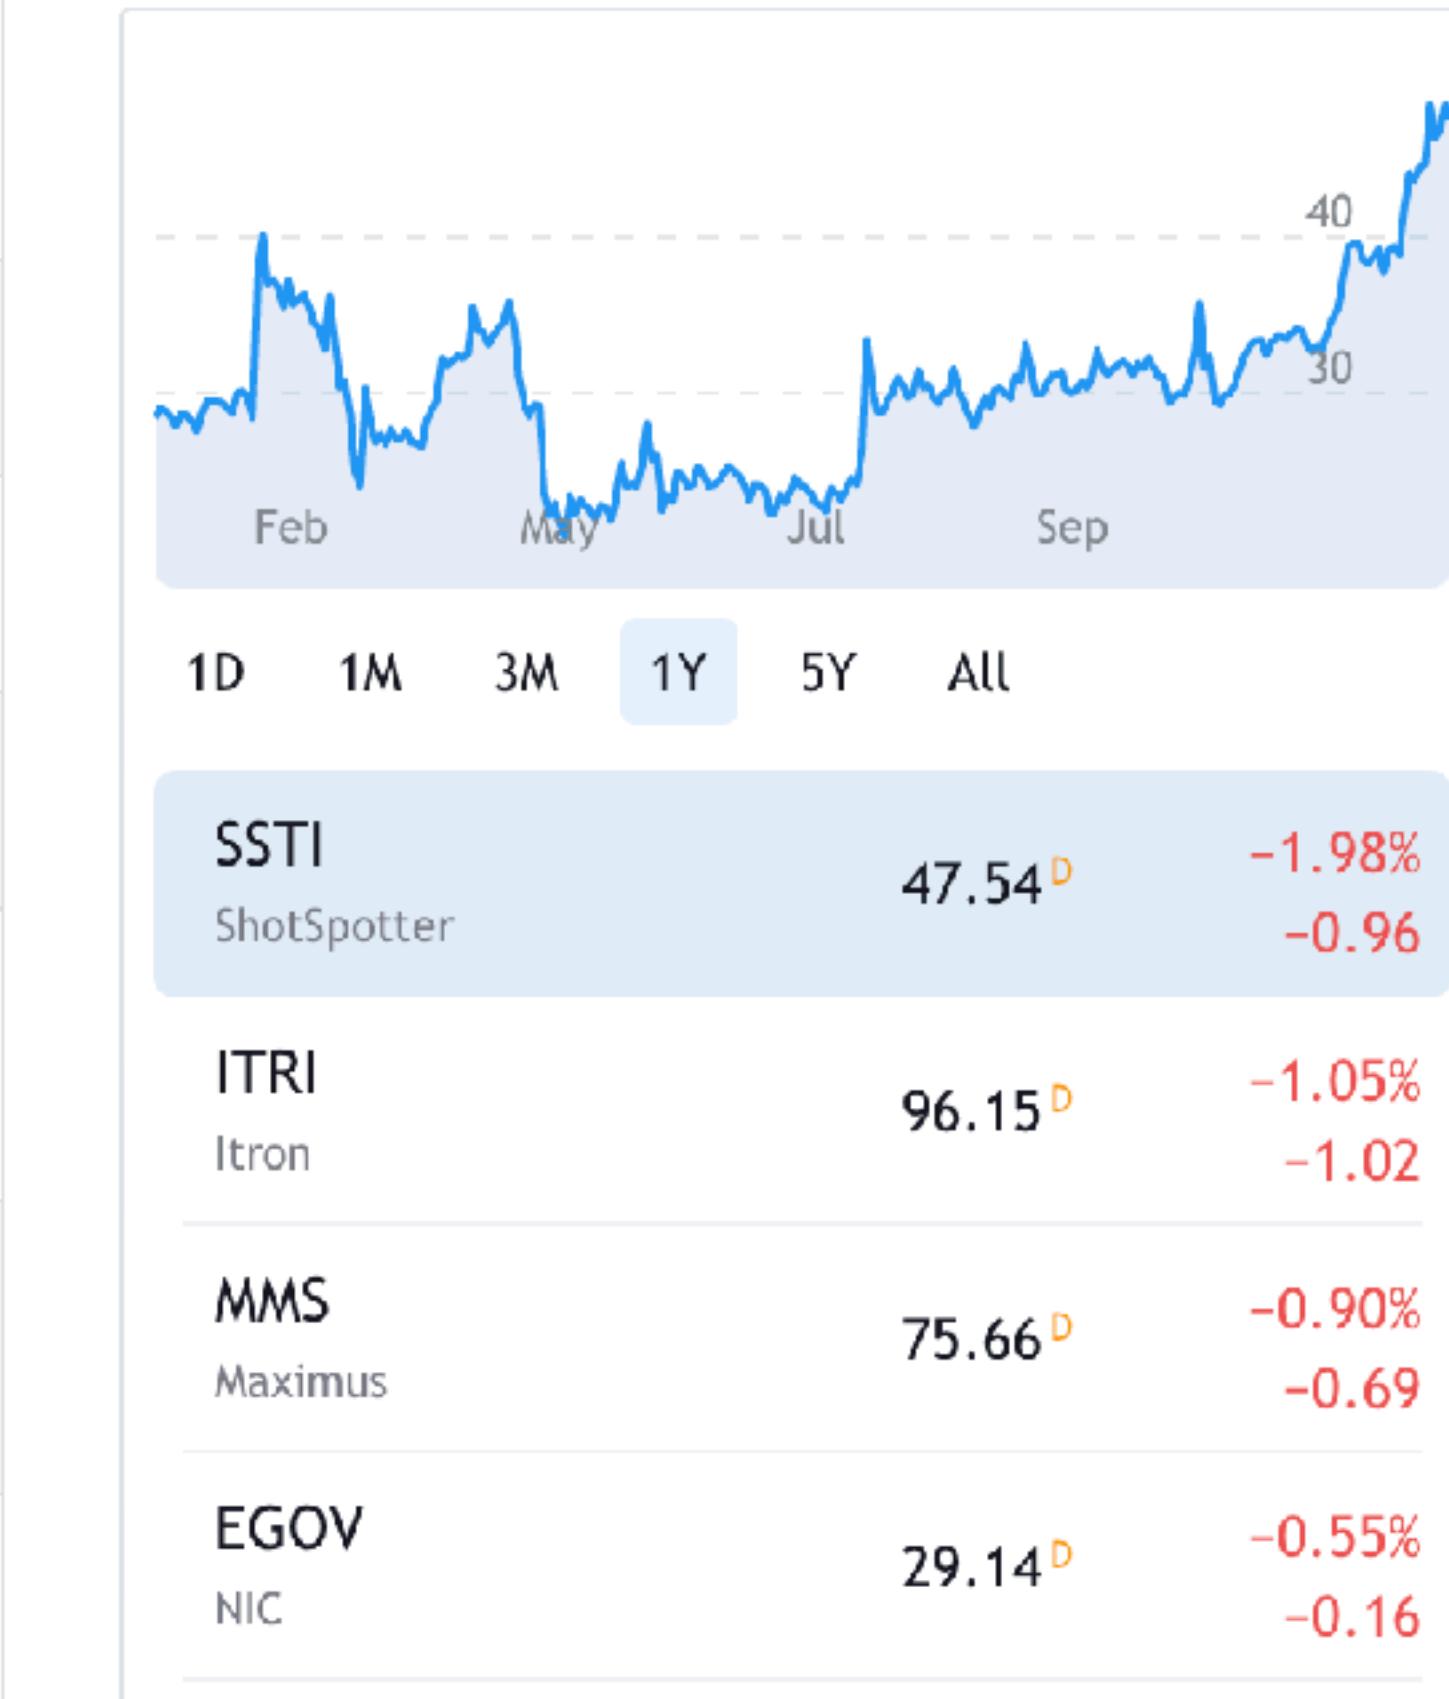

GOVERNMENT TECHNOLOGY MARKET

- Everything we do now uses technology — *same goes for government*. It just uses bad and old technology and spends too much money on it.
- Companies provide technology to execute policy such as business permitting apps for economic development or social services text-message systems for the safety net.
- Massive market opportunity & growing: In President Biden's 2021 stimulus plan: additional \$9 Billion for technology — specifically \$200M for staffing up federal technologists
- Lots of opportunities for technical and non-technical people
- Why? Other than \$\$\$...
 - Have impact *at scale*: influence many different jurisdictions, agencies, countries, etc
 - Gain business experience, connect with lots of governments, learn technology

EXAMPLES OF GOVTECH COMPANIES (FROM GT 100)

Name	Founded	Headquarters	Description

ADVICE FROM LA'S FORMER DEPUTY MAYOR & SANTA MONICA'S CITY MANAGER

Rick Cole
@urbanistcole

...

Replying to @DavidCMurphy @abhinemani and 5 others

Urge them to do the work, write about it, and speak about it.

A) They demonstrate & hone their passion and precision.
The jobs will come.

B) They get the psychic satisfaction of making a contribution despite not getting paid for it.

ADVICE FROM LINKEDIN

Marina Sebright • 1st

Data & Analytics Manager at King County Department of Executive S...

20h ...

Many governments open short-term or "temporary" positions that have 6 month - 2 year terms. These roles often provide an excellent introduction to working in government and position you to be a more competitive applicant for career service roles.

Erine Gray • 1st

Advocate for the Underserved, Founder Aunt Bertha, a PBC

14h ...

We currently have about 20 open positions. And despite stating clearly that we desire a cover letter, you'd be surprised how many people don't bother to take the time to write one. A well written cover letter shows the hiring manager that this person a) knows who our company is, b) demonstrates why they're interested and c) cares enough to put in a little effort — you'd be amazed how much of a great impression that leaves. In our organization, a well written cover letter goes to the top of the pile and it's something that is totally in control of the applicant!!
